### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-7, 10-17 and 20-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dhyanchand (U.S. Patent # 5,057,808) in combination with Yasohara et al. (U.S. Patent # 6,469,469).

Dhyanchand discloses claimed invention a power supply that generate alternating and direct current from DC voltage source (figure 3A and 3B), including an inverter (figure 3A item 41-43), auxiliary transformer (figure 3). However Dhyanchand does not disclose the utilization of the technique for controlling phase current by adjusting phase current and calculation of available current. Yasohara et al. teaches the utilization of the similar technique for adjusting phase current and generate voltage control signal (column 11, line 5-70). It would have been obvious one having an ordinary skill in the art at the time the invention made to modify Dhyanchand's power generating device by utilizing the technique taught by Yasohara et al. for the purpose of increasing the efficiency of the power generation.

***Allowable Subject Matter***

3. Claims 8-9, 18-19 and 27-28 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
